Touch Screen Terminal

Intelligent Data Collection!

Our Touch Screen Terminal is a touch screen data collection device with powerful capabilities. Because this terminal was designed by the Enterprise Team for **Enterprise Suite it has full integration and** functionality with Time & Attendance, Job **Costing, Labour Distribution, and Access** Control. This also allows a high level of scalability and customization for any of your current or future need. As part of its advanced features, every function button is customizable; from the function it performs to its colour! If security is a high issue, an HID or biometric reader can be attached for additional authentication. The Touch Screen **Terminal is another example of Enterprise** Time Inc.'s commitment to industry leading technology.

Interactive Transactions!

With our pop up menu system and smart filtering, your employees can more efficiently enter any information into a localized device! The menus filter out the options that aren't relevant according to previous selections and the operation's status. There's also an option for dollar and hours fields so only appropriate characters are imported into Enterprise Suite.

The above screens show the optional Job Costing integration. Up to 5 pop up menus can be used for entering Job information. (Job Number list on right) Similar pop up menus can also be used with the Labour Distribution Module. Using these screens the Job Cost/Labour Distribution information is automatically tracked and sent to Enterprise Suite where it can be edited or reported as per the module's requirements.
