

## PC Entry:

Enterprise Suite Virtual Terminal

- 8 Definable Function Keys
- Punch In/Out From Your PC
- Save on Hardware Costs
- Full Integration with Job Costing/ Labour Distribution

### Flexible Solutions for your Time Recording Needs!

*Save on hardware, add functionality!*

PC Entry is a simple to use yet powerful virtual terminal. It collects punches, transfers and any Job Cost or Labour Distribution related transactions all from the user's PC.

# PC Entry

## PC Entry Features:

- 8 Fully Definable Function Keys
- Employees can enter their badge or PIN number directly from their desks
- Optional wedge reader allows employees to swipe in/out instead of keyboard entry
- SQL compatible – no additional seat licenses required
- Resides on your network as a virtual terminal
- Replaces traditional data collection with virtual data collection – huge savings in cost
- Ability to validate punches, employees, work orders, etc.
- Drop down look-up list
- On-screen keypad or keyboard entry

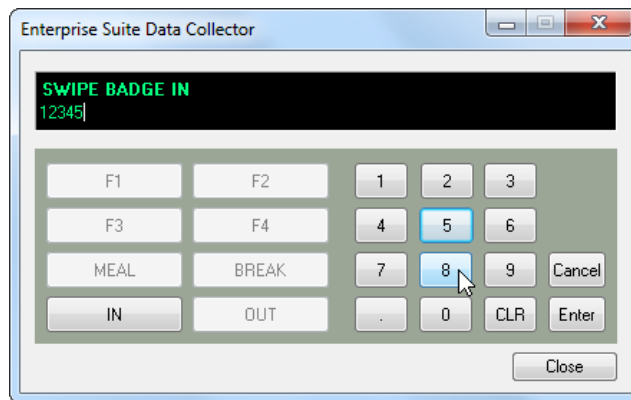

## In/Out Punches:

Punch in/out with ease by using either your keyboard or the on-screen keypad. Enjoy the convenience of a terminal on your desk.

## System Requirements:

One of either:

- Local Area Network (LAN)
- Terminal Services
- RDP
- Citrix

## Optional:

Optional Job Costing capabilities enable up to 5 different entries, such as, Job Number, Operation, Department, etc. (Must purchase additional Job Costing Module)
